### **GREEN FUTURE RESPONSE AND CONFIRMATION OF COOPERATION MATTERS** **T.M.Y Agro Trade / Smile Seed Bank × Green Future**

Dear Mr. Kawila and the Smile Seed Bank Team,

Thank you for your questions and supporting documents. Green Future (Global) Co., Ltd. has reviewed the matters concerning the proposed meeting, the first test order, the Traceability Pack, and the temporary packaging proposal. Our responses and confirmations are set out below.

Our objective is to develop a practical roadmap together, not to impose unilateral requirements. Green Future remains open and flexible and is prepared to consider reasonable alternatives and compromises so that both parties can work comfortably, efficiently, and with a clear shared understanding.

For ease of reference, we have consolidated all files into a single source-document register and provided our consolidated response below.

| # | Document Title                                                    | Date       | Ref. / Identifier                   | Purpose                                                                                                                                                                                                                                                                      |
|---|-------------------------------------------------------------------|------------|-------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Re: Green Future's Response - Meeting & First Test Order          | 22.08.2026 | GF/SSB/2026-0821                    | Smile's principal response letter: confirmation of agreed principles, the non-exclusive first order, 80/99 quality criteria, storage, Traceability, meeting-time options, and the list of materials and meeting objectives.                                                  |
| 2 | Pre-read: GF × SSB Meeting Pack - Label, Test Order, Traceability | 22.08.2026 | GF/SSB/2026-0821                    | Working pack for the 60-minute meeting: agenda, Traceability Pack questions, access/security, audit log, photographs/branding, legal-first label checklist, Gates 1-3, printing responsibility, and storage conditions.                                                      |
| 3 | First Test Order - Line List for Quotation                        | 22.08.2026 | GF/SSB/2026-0803 / GF/SSB/2026-0821 | Commercial structure of the first test order: 5 strains × 200 seeds, indicative price of EUR 1.15/seed, 50% advance, 200 bulk / 4 × 50 options, COA Option A/B, and requests for a Quotation/Pro Forma Invoice, label template, and Claims Procedure.                        |
| 4 | Packaging Proposal - Temporary First-Stage Use                    | 22.08.2026 | GF/SSB/2026-0821                    | Proposal for temporary use of approximately 10,000 existing 7 × 10 cm Smile packages with a 5.5 × 5.5 cm rear label; packing, labelling, and sealing by Green Future after written approval.                                                                                 |
| 5 | Package Mockup / Working Label & Packaging Visuals                | 22.08.2026 | linked to GF/SSB/2026-0821          | Visual appendix showing the front and rear of the existing Smile packaging and an example AF99 label placement with Qty, Purity, Germination, Collected/Tested/Expiry, Producer/Distributor, and Storage. This is a discussion mock-up, not standalone final label approval. |

## 1) Confirmed Principles and Cooperation Framework

### 1.1 Scope of GACP Certification

We confirm that Thailand Cannabis GACP certification applies to the production site, not to individual seed lots. This interpretation should be maintained in the relevant documents and agreements.

### 1.2 Status of Lot Documentation and the Traceability Pack

The lot documentation and Traceability Pack are supporting documents solely for lot identification and traceability purposes. They are not a separate GACP certificate, DTAM document or approval, and do not guarantee certification or a successful audit.

We propose the following disclaimer for the Traceability Pack:

*“This traceability documentation pack is intended solely for lot identification and to support traceability within the GACP framework. It is not a separate GACP certificate, DTAM document or approval, and does not guarantee certification or a successful audit.”*

We propose that the parties jointly confirm the final English wording and its placement in the relevant template or agreement before use.

### 1.3 Allocation of Responsibility

- Green Future is responsible for upstream operations under its control, including approved packing, sealing, and the documented handover of the products.

- Smile Seed Bank is responsible for downstream operations after the documented handover of the relevant lot.
- No package may be opened, divided, repacked, relabelled, or otherwise altered without prior written consent.

The point at which responsibility transfers from Green Future to Smile Seed Bank will be specified in the relevant Quotation, Purchase Order, handover/delivery record, or final agreement. Depending on the delivery model jointly selected, this event may be the documented handover to the carrier, receipt by the client's authorised representative, or signed acceptance by the receiving party.

#### 1.4 Contracting Party and Programme Scope

The contracting party on the Smile Seed Bank side will be T.M.Y Agro Trade Limited Partnership, operating under controlled-seed sales licence (P.P.4) No. 1011043900042568.

The programme applies exclusively to Green Future's documented seed programme. Other genetics, products, or brands offered by Smile Seed Bank fall outside the scope of this programme.

#### 1.5 Commercial Quality Specification

- Germination: not less than 80%
- Purity: not less than 99%

We propose recording the criteria applicable to each order in the relevant Purchase Order together with the claims procedure agreed by the parties. Each Purchase Order should also state the basis for the declared quality parameters, such as a documented Green Future internal lot test or an external laboratory analysis/COA. This confirmation is not an advance guarantee of any specific laboratory or lot result.

*For future Purchase Orders and the Claims Procedure, the parties should define the internal test method and minimum control parameters.*

#### 1.6 Lot Data and Post-Delivery Storage

We confirm the proposed set of lot data, from SKU through Source Document/Version. To preserve traceability, Green Future lot data should be transferred without alteration. Following lot release, the Pack Size/Quantity and Source Document/Version fields should be controlled, and any correction should follow a documented and traceable change procedure.

We also accept Smile Seed Bank's proposed post-delivery storage conditions: +5 to +10 °C and relative humidity not exceeding 50%, with electronic temperature and humidity logs maintained. These records may be considered as supporting evidence for a quality or germination claim. To avoid uncertainty, we propose agreeing in the Claims Procedure on a reasonable recording frequency and minimum retention period for these records.

*For claim assessment, the agreed storage controls should also include keeping products in their original sealed packaging, maintaining separate lot records, protecting products from light, moisture, and condensation, and allowing refrigerated packaging to acclimatise before opening.*

#### 1.7 Non-Exclusive First Test Order

The first test order will be non-exclusive. Any future exclusivity may be discussed separately after actual purchase and sales data become available and, if agreed, must be documented in writing.

#### 1.8 GACP-Related Marketing Wording

Green Future has no objection to the use of the term "GACP-ready" for marketing purposes, provided that it does not imply that the seeds or lots themselves are GACP-certified, and does not guarantee certification or a successful audit.

The term “GACP-ready” may appear on packaging only as part of packaging or label artwork approved in writing by both parties.

We also consider the following wording appropriate: “GACP-ready seeds - seeds accompanied by supporting documentation ensuring traceability for GACP purposes.”

For official documents, Green Future prefers the wording:

*“with supporting traceability documentation for GACP purposes”*

## 2) Meeting Confirmation

Green Future confirms Option C: Friday, 28 August 2026, from 10:00 to 11:00 Bangkok time (ICT). Smile Seed Bank may create and send the meeting link to Green Future.

The proposed meeting agenda includes:

- the final list of mandatory label fields and the approval process;
- the Quotation and first test order;
- the claims procedure and claim-submission period;
- the Traceability Pack design and control rules;
- the future B2B Distribution & Compliance Agreement; and
- the allocation of delivery costs for subsequent orders.

## 3) First Test Order

### 3.1 AF102 CRITICAL 2.0 AUTO

Green Future confirms the availability of AF102 CRITICAL 2.0 AUTO. This strain may be included in the first test order without substitution.

### 3.2 Packing Format

Green Future’s preferred standard format for this quantity is one sealed bulk package containing 200 seeds of each strain. As an exception for the first test order, Green Future is also prepared to offer four sealed packages containing 50 seeds of each strain.

If the 4 × 50 format is selected, the order will comprise 20 individually sealed units. We propose that each unit comply with the jointly approved requirements for labelling, lot/batch control, traceability, packing, and sealing. Additional packing may affect packaging and labelling costs.

Please confirm one of the following formats:

- One sealed bulk package containing 200 seeds of each strain; or
- Four sealed packages containing 50 seeds of each strain.

For illustration and future discussion, we propose the following indicative packing and processing cost matrix. The calculation is based on a standard finished package containing 50 seeds. If a different number of seeds per finished package is selected, the processing cost may be adjusted to reflect the actual workload and labour involved.

The applicable cost for the pilot order will be stated separately in the Quotation or expressly identified as included in the pilot-order price.

| Finished Packs | Total Seeds | Packing & Processing Cost, THB | Price per Pack, THB |
|----------------|-------------|--------------------------------|---------------------|
| 5              | 250         | 300.00                         | 60.00               |
| 8              | 400         | 300.00                         | 37.50               |
| 9              | 450         | 300.00                         | 33.33               |
| 13             | 650         | 330.00                         | 25.38               |
| 14             | 700         | 340.00                         | 24.29               |
| 19             | 950         | 390.00                         | 20.53               |
| 20             | 1,000       | 400.00                         | 20.00               |
| 25             | 1,250       | 440.00                         | 17.60               |
| 26             | 1,300       | 450.00                         | 17.31               |
| 49             | 2,450       | 660.00                         | 13.47               |
| 50             | 2,500       | 670.00                         | 13.40               |
| 75             | 3,750       | 900.00                         | 12.00               |
| 99             | 4,950       | 1,110.00                       | 11.21               |
| 100            | 5,000       | 1,120.00                       | 11.20               |

The final cost of preparing, packing, and processing retail packaging will be determined by Green Future using its internal cost-calculation model, taking into account the actual labour involved, the number of SKUs/lots, packaging volume, number of finished units, and the cost of the materials used.

### 3.3 Quotation, Currency, and Payment Terms

Green Future will prepare a Quotation or Pro Forma Invoice after the item list and packing format have been confirmed. Base B2B prices are set in EUR, while actual payment will be made in THB at the exchange rate applied on the date the Quotation or Pro Forma Invoice is issued. The document will state the exchange rate applied, the date on which it was fixed, and the total amount in THB. The stated THB amount will remain unchanged during the 14-day validity period of the relevant Quotation or Pro Forma Invoice.

*To avoid any ambiguity, the Quotation or Pro Forma Invoice will specify the source or rule used to determine the EUR/THB exchange rate, such as a named bank or official source, or the rate actually applied by Green Future on the issue date.*

- A 50% advance payment is due upon order confirmation.
- The remaining 50% is due when the goods are ready, and full payment must be received before dispatch or handover.

### 3.4 Processing, Dispatch, and COA Options

Smile Seed Bank may select either of the following options for the first test order and confirm its preferred option directly to Green Future.

#### Option 1: Seeds are dispatched first; the COA is provided later

- Smile Seed Bank pays a 50% advance upon order confirmation.

- Green Future prepares the seeds in approximately seven days, subject to lot availability, completion of quality control, and availability of approved packaging and labels. As the official COA is not yet available under this option, quality release will be based on Green Future's documented internal lot test, recording the actual Germination and Purity results.

*For Option 1, the internal batch test will follow a controlled SOP or protocol specifying the sample size, Germination and Purity methods, test date, responsible person, and lot reference. This will provide a documented basis for quality release before the external COA is issued.*

- When the seeds are ready for dispatch, Green Future requests payment of the remaining 50%.
- Green Future dispatches the seeds after full payment has been received.
- The official COA is provided separately after it is issued by the laboratory.

Under this option, the seeds and COA are not dispatched at the same time.

## **Option 2: Seeds and COA are dispatched together**

- Smile Seed Bank pays a 50% advance upon order confirmation.
- Green Future prepares the seeds and awaits the official laboratory COA.
- The estimated COA processing time is approximately 30 days.
- When the seeds and COA are ready, Green Future requests payment of the remaining 50%.
- The balance must be paid in full before dispatch.
- After full payment is received, Green Future dispatches the seeds together with the COA. The estimated delivery time is approximately seven days.

The total estimated lead time for Option 2 is approximately 30 days for laboratory COA processing plus approximately seven days for delivery.

All timelines are estimates and depend on lot availability, completion of quality control, readiness of approved packaging and labels, and laboratory processing times. Green Future does not guarantee the laboratory result or issue date unless separately confirmed in writing.

Please confirm whether Smile Seed Bank selects Option 1 or Option 2.

## **4) Working Label Template**

We propose that both parties jointly review and approve the label in writing before printing or use. The first approved label should carry a version number, such as V1.0, and that version should be identified in the relevant Purchase Order or packing record.

For the first test order, Green Future will print the approved labels, apply them to the packaging, pack and seal the products, and prepare the goods for handover. The allocation of label and packaging-material costs for subsequent orders may be agreed separately in the commercial terms or the B2B Distribution & Compliance Agreement.

The final list of mandatory fields and their placement within the available 5.5 × 5.5 cm rear-label area remain under review and will be confirmed separately in writing.

*As part of the final label checklist, the parties will verify the DOA requirements concerning language, legibility, and mandatory fields.*

## 5) Claims Procedure Template

Green Future will provide Smile Seed Bank with a Claims Procedure Template and a sample Google Form for review and internal adaptation. The controlled document will be marked:

*“For partner adaptation / not for direct customer distribution.”*

The following supporting evidence may be considered when assessing a claim:

- the condition of the packaging;
- whether the packaging was opened or damaged;
- the storage method and electronic temperature/humidity logs;
- the relevant lot/batch information;
- the results of any lot testing; and
- any other materials relevant to the claim.

If the packaging was opened or damaged, or the storage conditions were not followed, those circumstances will be considered when assessing the possible cause of reduced quality or germination. A deviation from the storage conditions will not, by itself, result in automatic rejection of a claim. The assessment will be based on the available facts and supporting evidence. The final claim-submission period and evidence requirements will be stated in the Claims Procedure Template provided for review.

*Before the Claims Procedure is issued, the parties should agree on the minimum evidence set and the date from which the claim period begins, such as the date the goods are dispatched from the warehouse. The Google Form will be presented as a technical interface example and not as a standalone contractual document.*

## 6) Traceability Pack

### 6.1 Document Priority and Data Control

The signed PDF issued by Green Future will be the primary document. CSV files will be used for data import only. Each controlled document should contain the Document Number, Template Version, Issue Date, and corresponding Source Document/Version.

For reliable traceability, Green Future lot data should be transferred without alteration, while system or display fields created by Smile Seed Bank should be stored separately. We also recommend protecting Pack Size/Quantity and Source Document/Version from direct editing after lot release, while retaining a documented history of any agreed corrections.

*The system should maintain a complete audit log recording, at minimum: user, timestamp, action, field, old value, new value, reason, and source document or version. Immutable Green Future fields should not be edited directly; corrections should be recorded through a separate amendment entry. The retention period should be agreed in the B2B Agreement and should be no shorter than the applicable mandatory retention period.*

### 6.2 Access Model

We propose a two-tier access model:

#### Public access without registration

Commercial Name, Variety Code, Lot/Batch No., lot status, Germination, Purity, Test Date, Test Basis, Producer, lot-authenticity confirmation, and a brief GACP disclaimer.

## Access via QR/token or an authorised account

Signed Traceability PDF, COA/ISTA, Source Document/Version, additional Green Future documents, change history, and other non-public information.

For appropriate data protection, we propose configuring the system so that it does not permit bulk public viewing or sequential enumeration of all lot numbers.

*For clarity, “lot-authenticity confirmation” means only confirmation that the entered Lot/Batch No. corresponds to a record or document issued by Green Future.*

## 6.3 Template Approval

We propose that Smile Seed Bank provide a draft PDF template so that both parties can jointly review and approve it in writing before it is used in customer-facing materials. The joint review may cover document structure, data mapping, access rules, protected Green Future fields, use of Green Future branding and documents, and the process for recording and displaying changes.

Customer-facing launch is recommended after the first order so that the import of actual lot data can be tested before launch.

*Smile Seed Bank may use the Variety Code together with the agreed Commercial Name without disclosing pedigree information. Photographs of the production site may be used only with Green Future’s prior written approval, preferably with a Green Future watermark, and solely for the agreed purpose. Any use in public marketing requires separate written approval.*

## 7) Lead Registration and Sales-Channel Protection

Lead Registration and sales-channel protection will be addressed in the future B2B Distribution & Compliance Agreement and are not conditions of the first test order. The definition of a registered lead, the method and date of registration, the protection period, exclusions, channel-overlap cases, and termination rules may be discussed and documented separately by mutual agreement.

## 8) Temporary Smile Seed Bank Packaging

### 8.1 Conditional Acceptance for Evaluation

Green Future is prepared to evaluate Smile Seed Bank’s existing 7 × 10 cm packaging with an available 5.5 × 5.5 cm rear-label area for the first-stage pilot order. This means acceptance for evaluation only and does not constitute final packaging approval.

To reach a practical and well-founded decision, we propose jointly checking the physical packaging, its suitability for hermetically packing seeds, the final label content and layout, and the results of a physical packaging and label test before final written approval. Photographs and a PDF mock-up may be used as useful preliminary materials alongside examination of the physical sample.

### 8.2 Packaging Information and Physical Testing

We would appreciate physical samples and sufficient information to confirm that:

- the packaging is new and has not previously been used;
- the material is suitable for sealed, moisture-protective seed storage;
- the sealing method and seal quality are suitable;
- the packaging is free from contamination and damage; and
- existing text, QR codes, or other design elements do not conflict with the approved label.

We propose using a physical print and packing test to verify:

- the legibility of mandatory Thai and English information within the 5.5 × 5.5 cm area;
- capacity for the selected 50- or 200-seed format;
- suitability for hermetic sealing; and
- label adhesion at +5 to +10 °C and after acclimatisation.

### 8.3 Pilot-Order-Only Status and Version Control

Approved packaging will be marked “Temporary packaging for pilot order only”.

The parties may review the packaging format again for subsequent lots in light of the first test order results. For clarity, written approval should identify the approved version precisely by attaching front and rear photographs or PDF artwork and stating the packaging-template name, label version, pack size, and approval date.

### 8.4 Packing and Labelling at the Production Site

For the first test order, Green Future will print and apply the approved labels, pack and seal the products, and prepare the goods for handover at the production site. To preserve the agreed traceability and labelling-control system, we propose that any printing, label application, packing, splitting, repacking, relabelling, or use of alternative packaging by Smile Seed Bank be discussed in advance and agreed by the parties in writing.

If any packaging unit is unsuitable for sealing, labelling, or normal production use, Green Future will document the issue and agree with Smile Seed Bank on a suitable replacement or other practical solution.

### 8.5 Packaging Delivery, Acceptance, and Transport Costs

For an orderly handover, we propose that Smile Seed Bank:

- inspect the condition of the packaging;
- count the packaging units;
- enclose a document stating the quantity inside the shipment; and
- pay the cost of delivering the packaging to Green Future’s production site.

Upon receipt of the packaging, Green Future will:

- inspect the external condition of the shipment and the packaging received;
- recount the packaging units against Smile Seed Bank’s document;
- prepare photographic evidence and a receipt record; and
- send the photographs and confirmed quantity to Smile Seed Bank.

If the quantity or condition does not match the enclosed document, Green Future will notify Smile Seed Bank and provide supporting evidence for joint review.

*Green Future’s acceptance of the packaging confirms only the actual quantity and visible condition at the time of receipt. It does not constitute Green Future’s acceptance of responsibility for latent manufacturing defects in packaging supplied by Smile Seed Bank that may be discovered during packing.*

#### For the first test order:

- Smile Seed Bank will pay the cost of delivering its packaging to Green Future’s production site.
- Green Future proposes to pay the one-time cost of delivering the seeds from Green Future to Smile Seed Bank.

Green Future's payment of seed-delivery costs for the first test order is a one-time pilot-order exception and does not establish a standing term for future orders. The allocation of delivery costs for each subsequent order will be discussed and confirmed in the relevant Quotation, Purchase Order, or other written commercial terms.

### 9) Expiry Date on the Final Label

Green Future confirms that the term "Expiry Date" may be used on the final label in the following format:

**Expiry Date: DD/MM/YYYY**

The actual date for each lot will be determined from the relevant lot information and included in the label version jointly approved in writing by the parties before printing or use.

### 10) Confirmed Matters

- GACP applies to the production site, not to individual seed lots.
- The Traceability Pack is supporting documentation and is not a GACP certificate, DTAM document or approval, or a guarantee of a successful audit.
- The term "GACP-ready" or alternative wording may be used for marketing purposes subject to the conditions in this letter.
- The first test order is non-exclusive.
- The contracting party is T.M.Y Agro Trade Limited Partnership, operating under P.P.4 No. 1011043900042568.
- The working commercial specification is Germination of not less than 80% and Purity of not less than 99%, as stated in the relevant Purchase Order.
- AF102 CRITICAL 2.0 AUTO may be included in the first test order.
- Payment terms are 50% in advance and 50% when the goods are ready, with full payment received before dispatch.
- Smile Seed Bank may select either earlier seed dispatch followed by the COA, or joint dispatch of the seeds and COA.
- Smile Seed Bank's existing packaging may proceed to pilot evaluation but is not finally approved until packing and packaging tests have been completed.
- Smile Seed Bank will pay the cost of delivering its packaging to Green Future.
- Green Future will pay the cost of delivering the seeds for the first test order to Smile Seed Bank.
- The term "Expiry Date" will be used on the final label.
- The meeting is confirmed for Friday, 28 August 2026, from 10:00 to 11:00 Bangkok time (ICT).

### 11) Matters Requiring Confirmation and Agreement

- Smile Seed Bank's selection between Option 1 and Option 2 for dispatch of the seeds and COA.
- Smile Seed Bank's selection between the 200-seed bulk format and the 4 × 50-seed format.
- The final list of mandatory fields for the Working Label Template.
- The final claim-submission period and supporting-evidence requirements.
- The results of inspection and testing of the physical temporary packaging.
- The allocation of delivery costs for subsequent orders.
- The additional packing and processing cost for the 4 × 50 format and the method for calculating packaging-material and printing costs for future orders.

*The parties should also agree on the audit-log retention period, the rules for using production-site photographs and the desired list of such photographs, and an updated customer packing matrix based on the latest calculator version for future orders.*

## 12) Next Steps

- Smile Seed Bank sends the meeting link for Friday, 28 August 2026, 10:00-11:00 ICT.
- Smile Seed Bank confirms Option 1 or Option 2 for dispatch of the seeds and COA.
- Smile Seed Bank confirms the 200-seed bulk format or the 4 × 50-seed format.
- Smile Seed Bank sends physical samples of the 7 × 10 cm packaging and the relevant information on the material, moisture-protection properties, and sealing method.
- Smile Seed Bank checks and records the packaging quantity, encloses a quantity document, and pays delivery to Green Future.
- Smile Seed Bank provides a version-controlled draft Working Label and Traceability Pack template.
- Green Future recounts the packaging and provides photographic and documentary confirmation.
- Green Future prepares a Quotation or Pro Forma Invoice after the item list, packing format, and dispatch option have been confirmed.
- Green Future provides a Claims Procedure Template and sample Google Form for Smile Seed Bank's review.
- The parties discuss the allocation of delivery costs for subsequent orders and the future B2B Distribution & Compliance Agreement.
- After the packing format has been selected, the Quotation will state the Packaging & Processing Fee as a separate line item or expressly indicate that it is included in the pilot-order price. For subsequent orders, the parties will consider an agreed packing and processing cost matrix.

*Green Future provides a signed Lot/Traceability PDF and a CSV file for import with the first delivery, as requested in Smile Seed Bank's First Test Order Line List.*

Sincerely,

**Yevhen Karasov**

Director

Green Future (Global) Co., Ltd.
