Confirmation and Response — Traceability, Label V.2, Lead Registration & Quotation

T.M.Y Agro Trade / Smile Seed Bank × Green Future

Dear Kawila and Smile Seed Bank Team,

Thank you for your detailed follow-up and for the continued cooperation.

Green Future has reviewed both of your recent letters regarding the **Traceability Pack Preview** and **Label V.2, Lead Registration & Quotation**. Please find our confirmation and comments below.

1. Traceability Pack

We confirm that the current Traceability page may remain online strictly in **Preview mode** for review purposes and is not considered a customer-facing launch.

We confirm the proposed English disclaimer, subject to Julia's final check that the English and Thai wording displayed on the page correctly reflects the wording previously agreed. The Public Tier and Restricted Tier structure is also accepted.

For the first actual shipment, Green Future will provide the primary **Signed Lot/Traceability PDF** together with a **CSV or other mutually agreed import file**. The Lot/Batch No. must be identical across the pouch label, PDF, import file and Traceability lookup.

For Restricted Tier access, we propose using both **QR/token per lot and an authorised customer account**, provided this is technically practical. The primary Traceability PDF will be prepared and signed by Green Future. Smile Seed Bank may import and display the approved data but should not modify or sign the primary PDF on behalf of Green Future.

For the Audit Log, we propose a retention period of **at least three years** from the last modification of the relevant record or closure of the lot, or longer where required by applicable law, regulatory requirements or contractual documentation.

The system must remain in Preview mode until the first actual lot has been imported and tested and Green Future has provided separate written approval to move from **Preview** → **Live**.

2. Packaging Samples

Green Future confirms receipt of **12 packaging samples**. We are currently testing the actual sealing, seal strength/quality and suitability for the intended seed quantity.

The 5.5 × 5.5 cm label placement and legibility test is still pending printing of the approved label mock-up. We will provide written feedback once the physical test is completed.

3. Farm and Facility Photographs

We agree with the proposed photograph use. Each photograph must receive separate written approval from Green Future before use, and we recommend applying a **Green Future watermark**.

Please revise item C to:

“Seed production/processing area within the GACP-certified production facility.”

This wording more accurately reflects that GACP certification applies to the certified Green Future production facility rather than to an individual production line.

4. Lead Registration

We agree with the Lead Registration principle and the protection of customers genuinely introduced by Smile Seed Bank.

For clarity, we propose that the protection does not apply to customers with whom Green Future had documented relations before lead registration or who independently contacted Green Future before registration.

Necessary technical, compliance or quality communication with registered customers may take place with Smile Seed Bank informed/copied and will not be considered circumvention.

The detailed protection period and mechanism can subsequently be incorporated into the Distribution Agreement. Green Future confirms that it will not use registered leads to bypass Smile Seed Bank during the agreed protection period.

5. Label V.2

We agree with the updated Regulatory Gate and the approach of having a specific label version, written approval by both parties and a physical packaging test before final printing.

Please send us the **Label V.2 PDF mock-up directly for review**, as the admin preview link currently requires a login and password.

6. Updated Quotation

We confirm the requested configuration:

5 strains × 4 × 50 seeds = 1,000 seeds / 20 sealed units, under **Option 1**, with official COA to follow later.

The updated Quotation will be issued in THB, valid for 14 days, with the applicable EUR/THB exchange-rate rule stated. Packaging & Processing will either be shown separately or clearly indicated as included in the pilot price.

The Quotation itself does not reserve stock. Availability and price will be reconfirmed before the PO, and reservation will only take effect according to the payment/reservation conditions stated in the accepted Quotation/PO.

We appreciate Smile Seed Bank's transparent and constructive cooperation and look forward to continuing a fair, long-term and mutually beneficial partnership.

Sincerely,

Yevhen Karasov

Director

Green Future (Global) Co., Ltd.
